# Poverty in Belarus: An Overview

Kateryna Bornukova, BEROC  
Minsk, March 2019

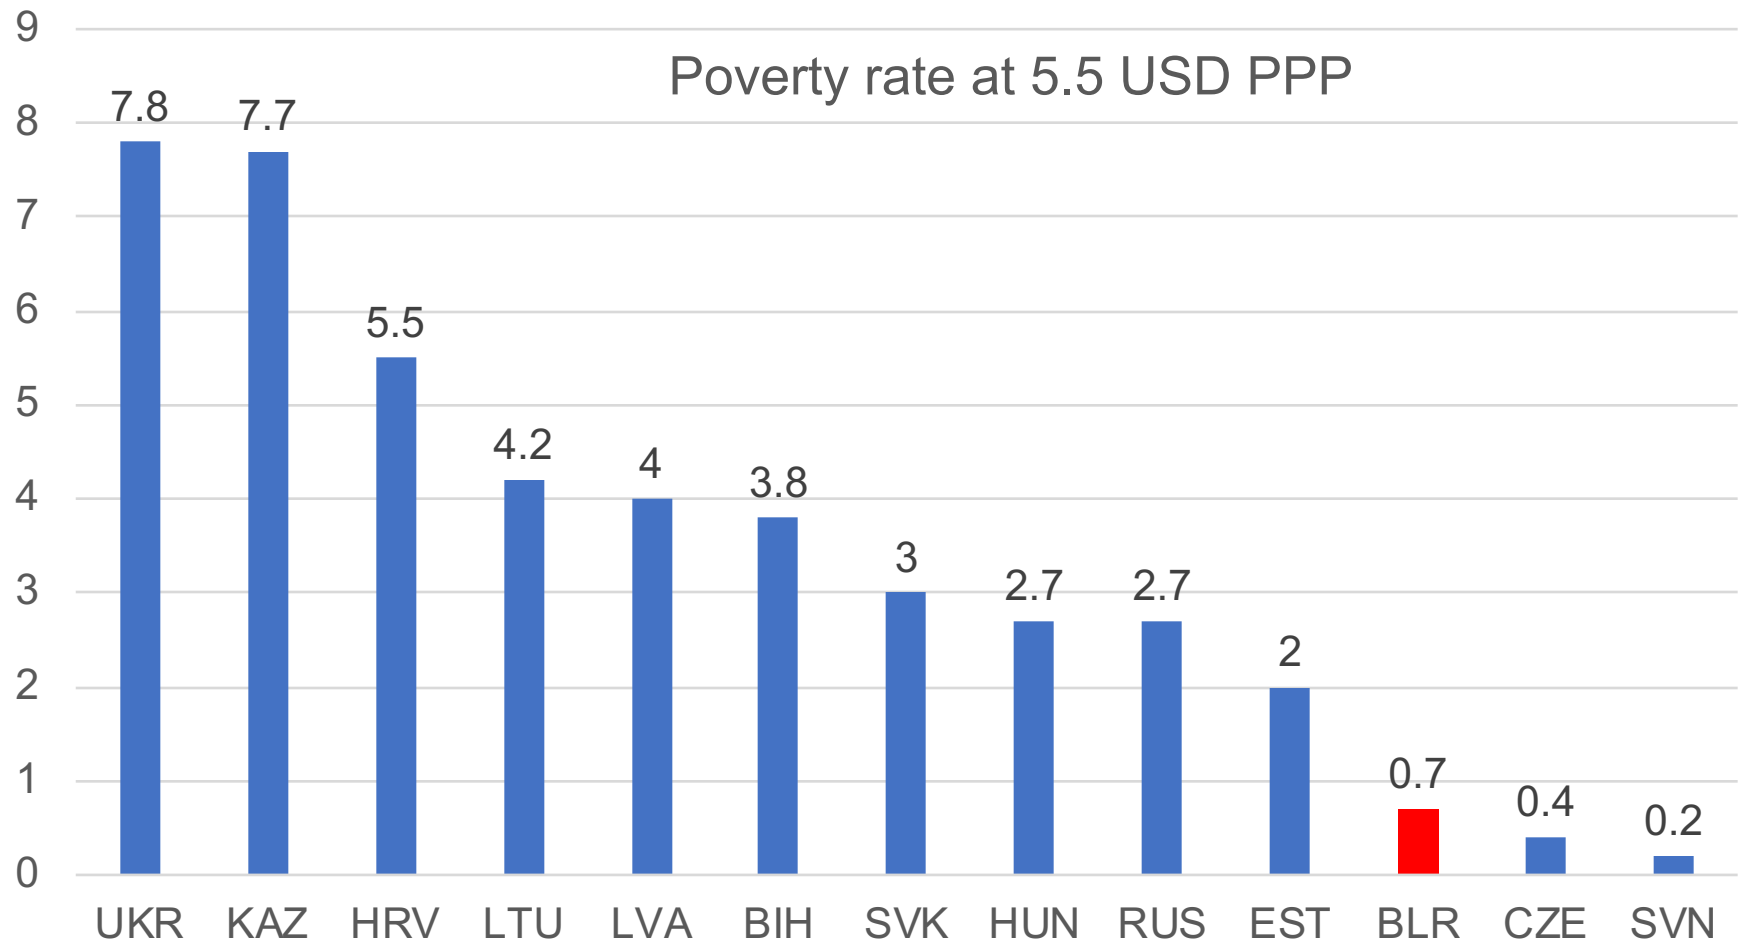

# GDP Growth in Belarus

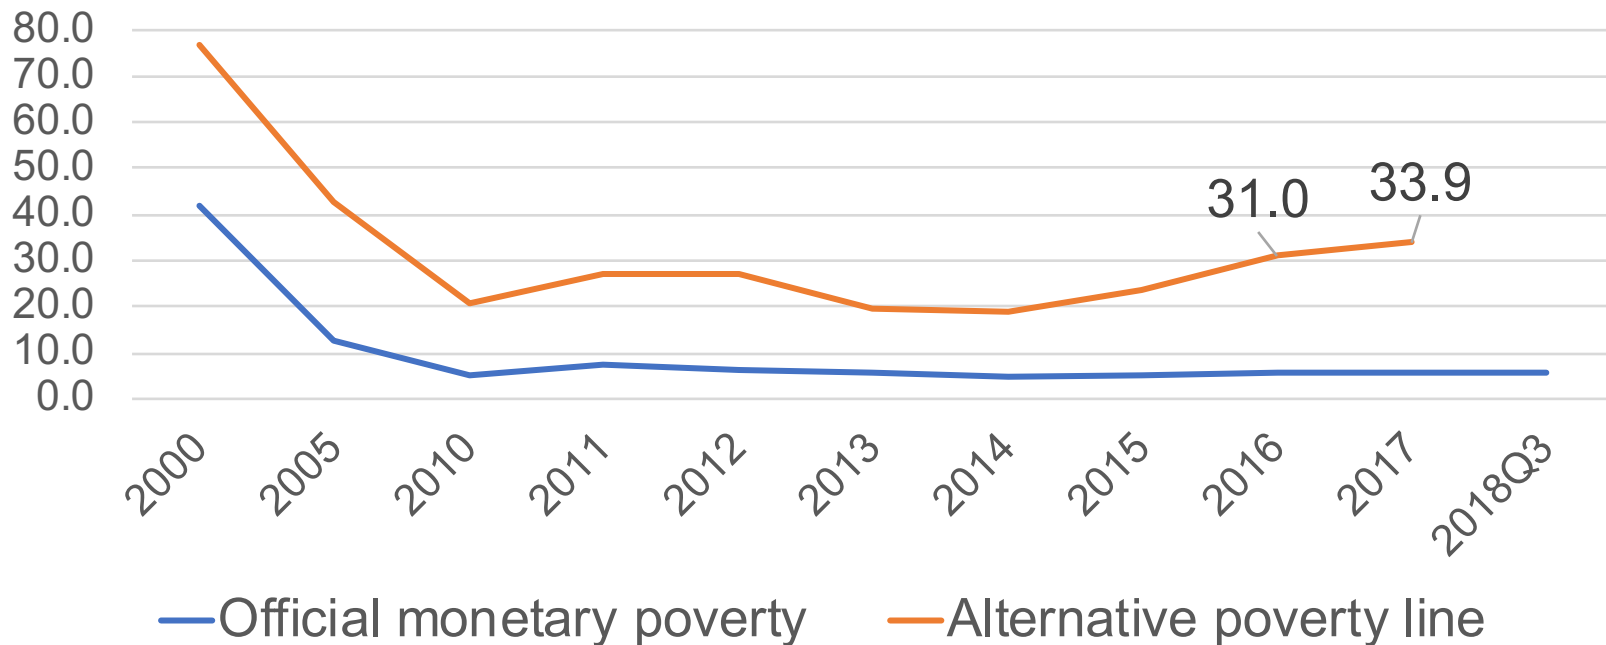

# Belarus effectively fights poverty

# Belarus is a regional champion

# Alternative measures of poverty

- Official poverty line: 240.8 BYN
- Alternative poverty line: 451 BYN
- Mazol (2017), WB methodology: 29% poor in 2016

# Vulnerable groups

- Households with children:
  - HH with 3 or more children: official poverty 26.5%
  - HH with single parent: 15.8%
  - Children: 10.3%
- Retirees
  - Not officially poor: minimal pension higher than poverty line
  - It does not take into account their needs
- Unemployed
  - 13.5% (Shymanovich, 2017)

# How does Belarus fight poverty?

- Pensions
- Child benefits (universal 0-2)
  - But very low unemployment benefit
  - Very low benefits on poverty assistance
- Less formal forms of support
  - Indirect subsidies (utilities)
  - Employment opportunities on state-owned enterprises (SOEs)

# Major social expenditures, % of GDP

Education

Social assistance

Pensions

Health

Benefits (through Social Fund)

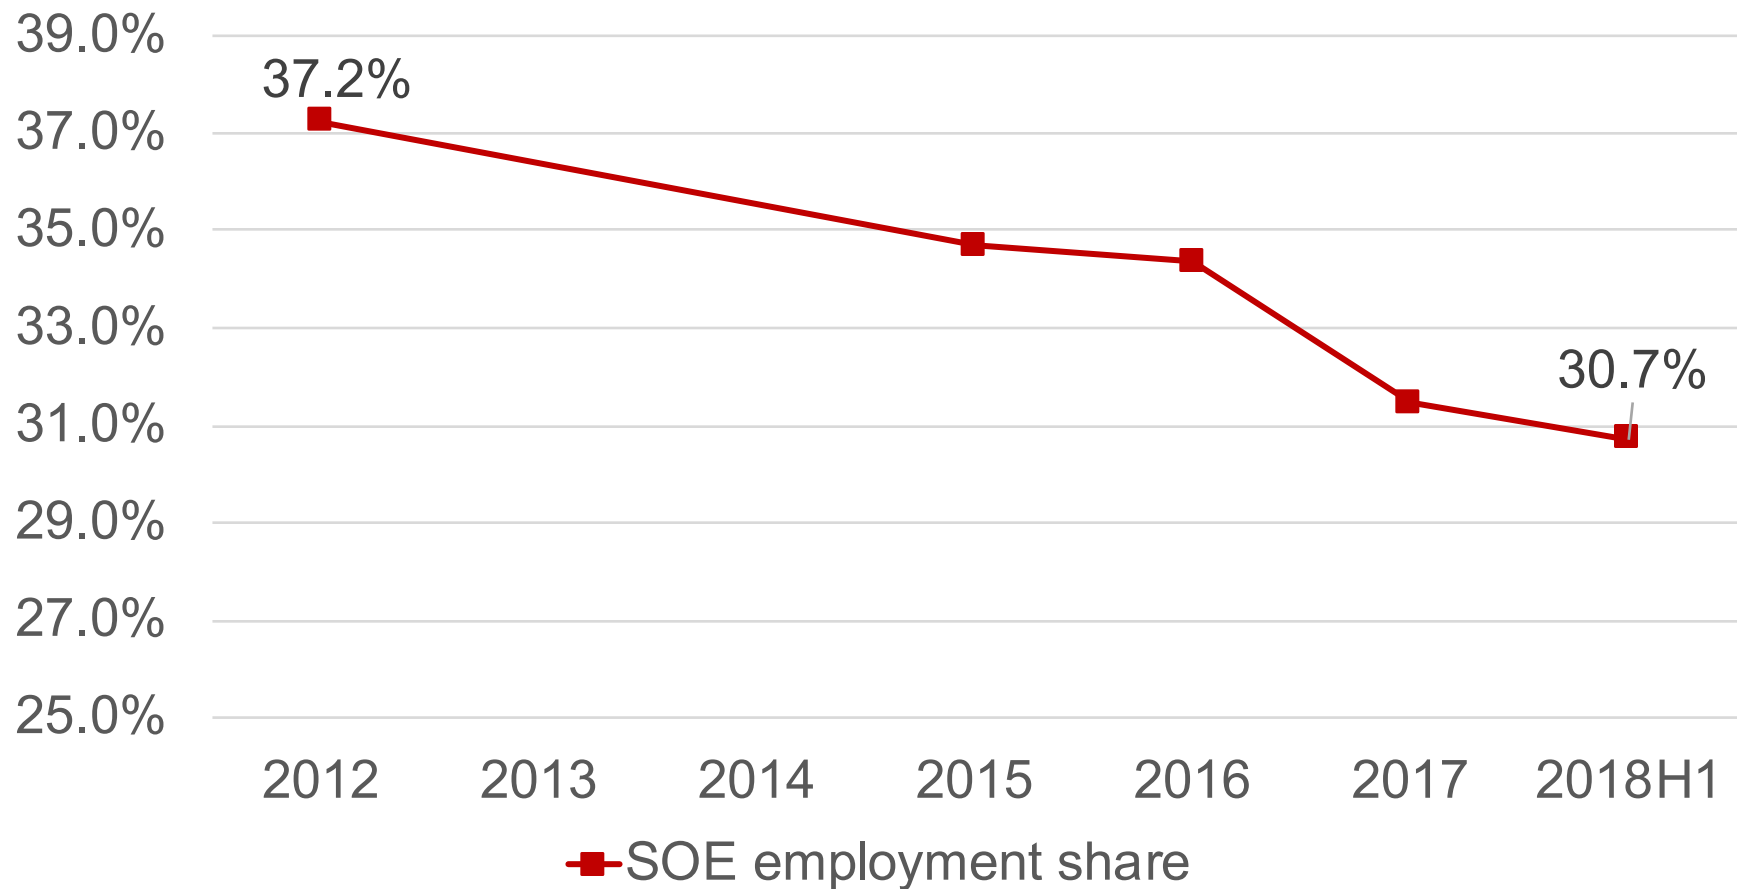

# What is effective in reducing poverty?

- Fiscal policy in Belarus reduces poverty by 17 p.p. and inequality (Gini) from 0.41 to 0.27
  - Pensions: -19.2 p.p. poverty
  - Child benefits: - 3.9 p.p. poverty
  - Indirect utilities subsidies: -1.2 p.p. poverty
  
- What is cost-effective?
  - Pensions and child benefits ok
  - Unemployment benefits small but efficient
  - Indirect utilities subsidies are inefficient

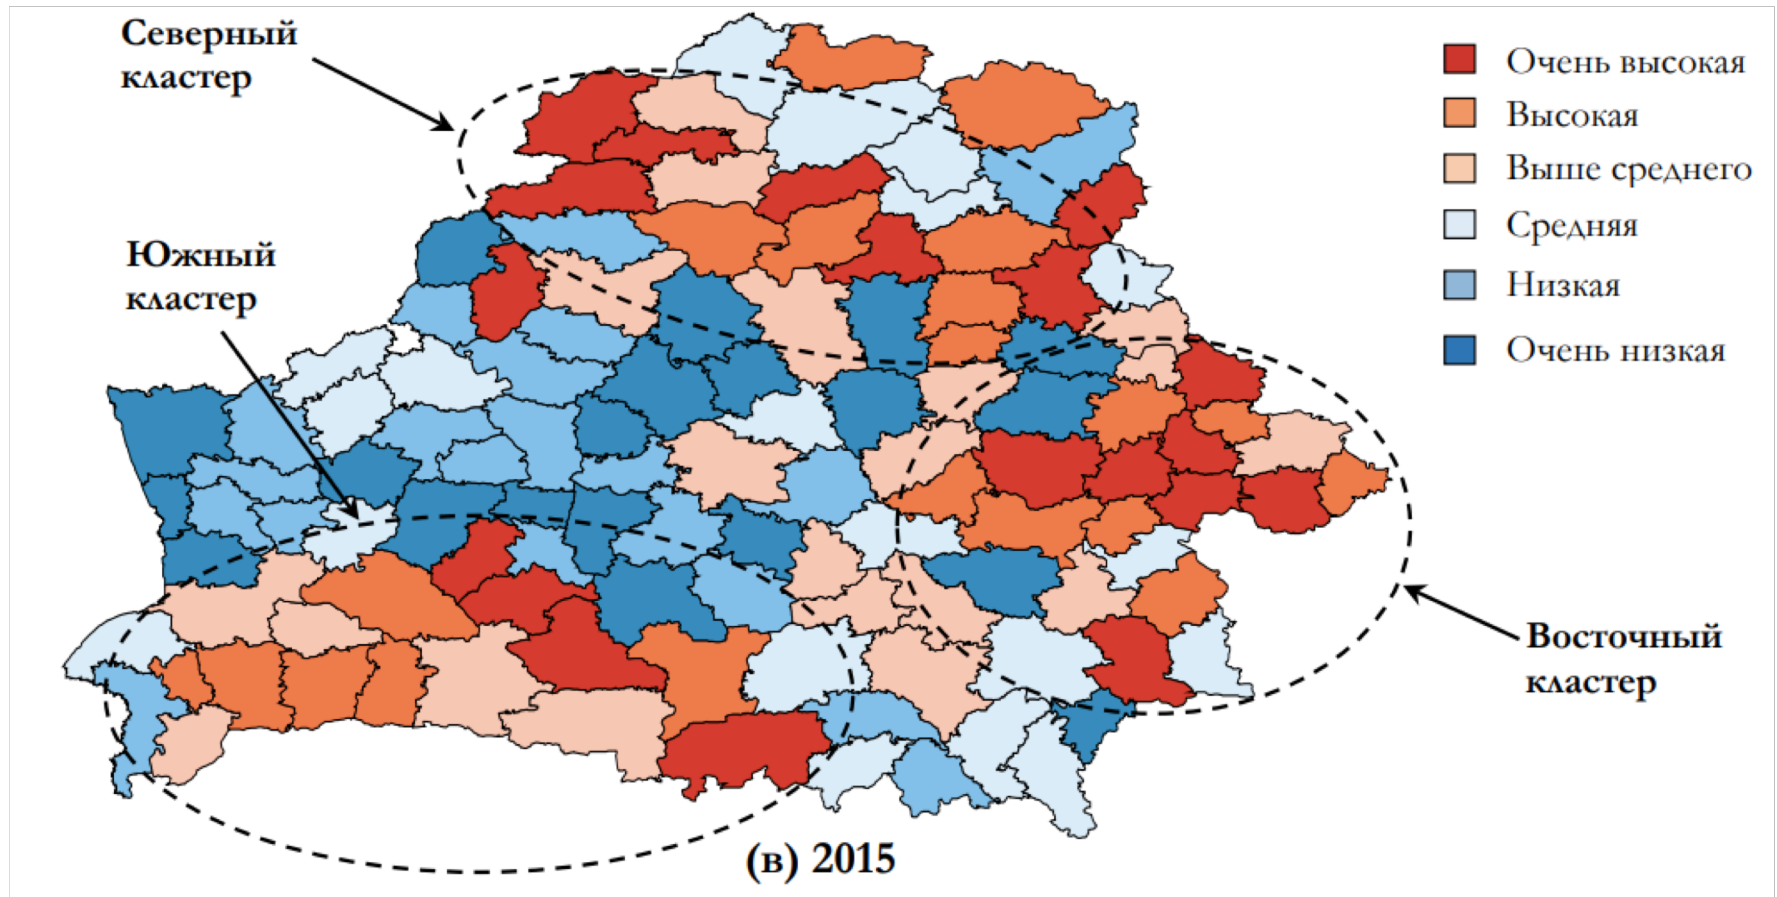

# What about (un)employment?

# Can SOE's provide employment?

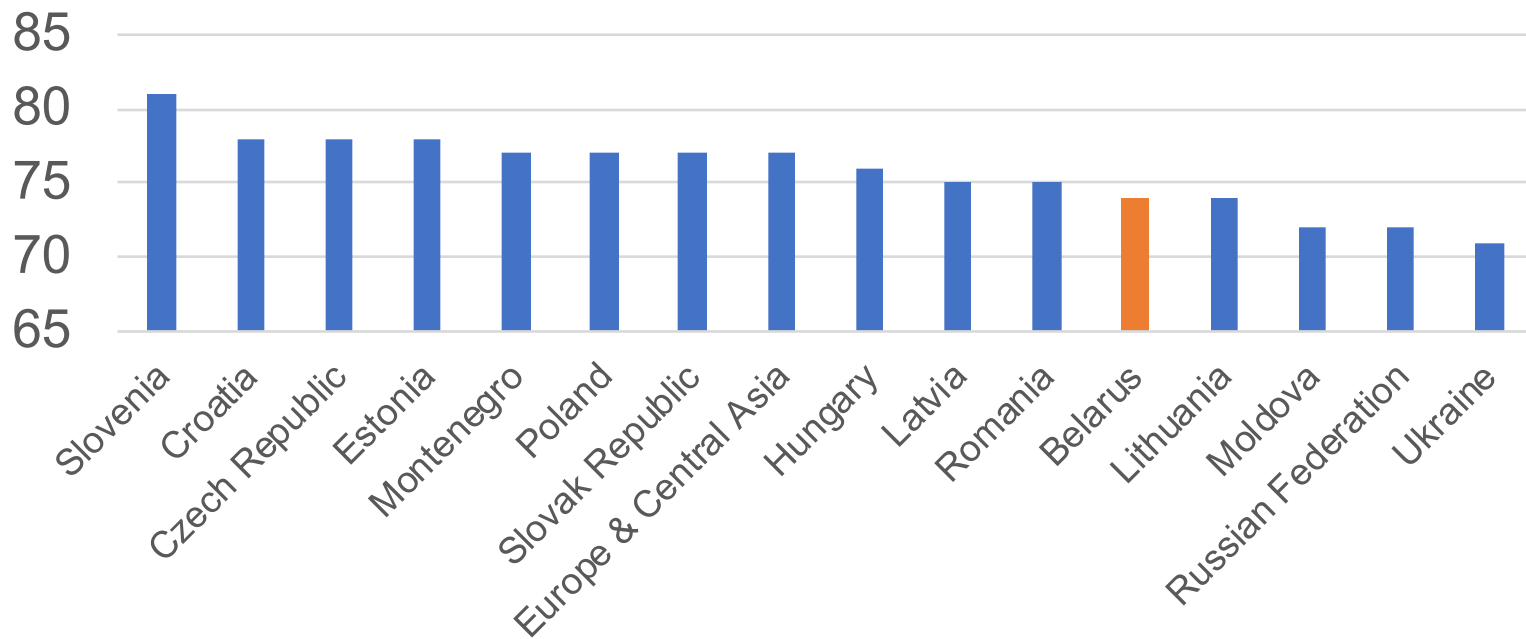

# Social “Parasites”

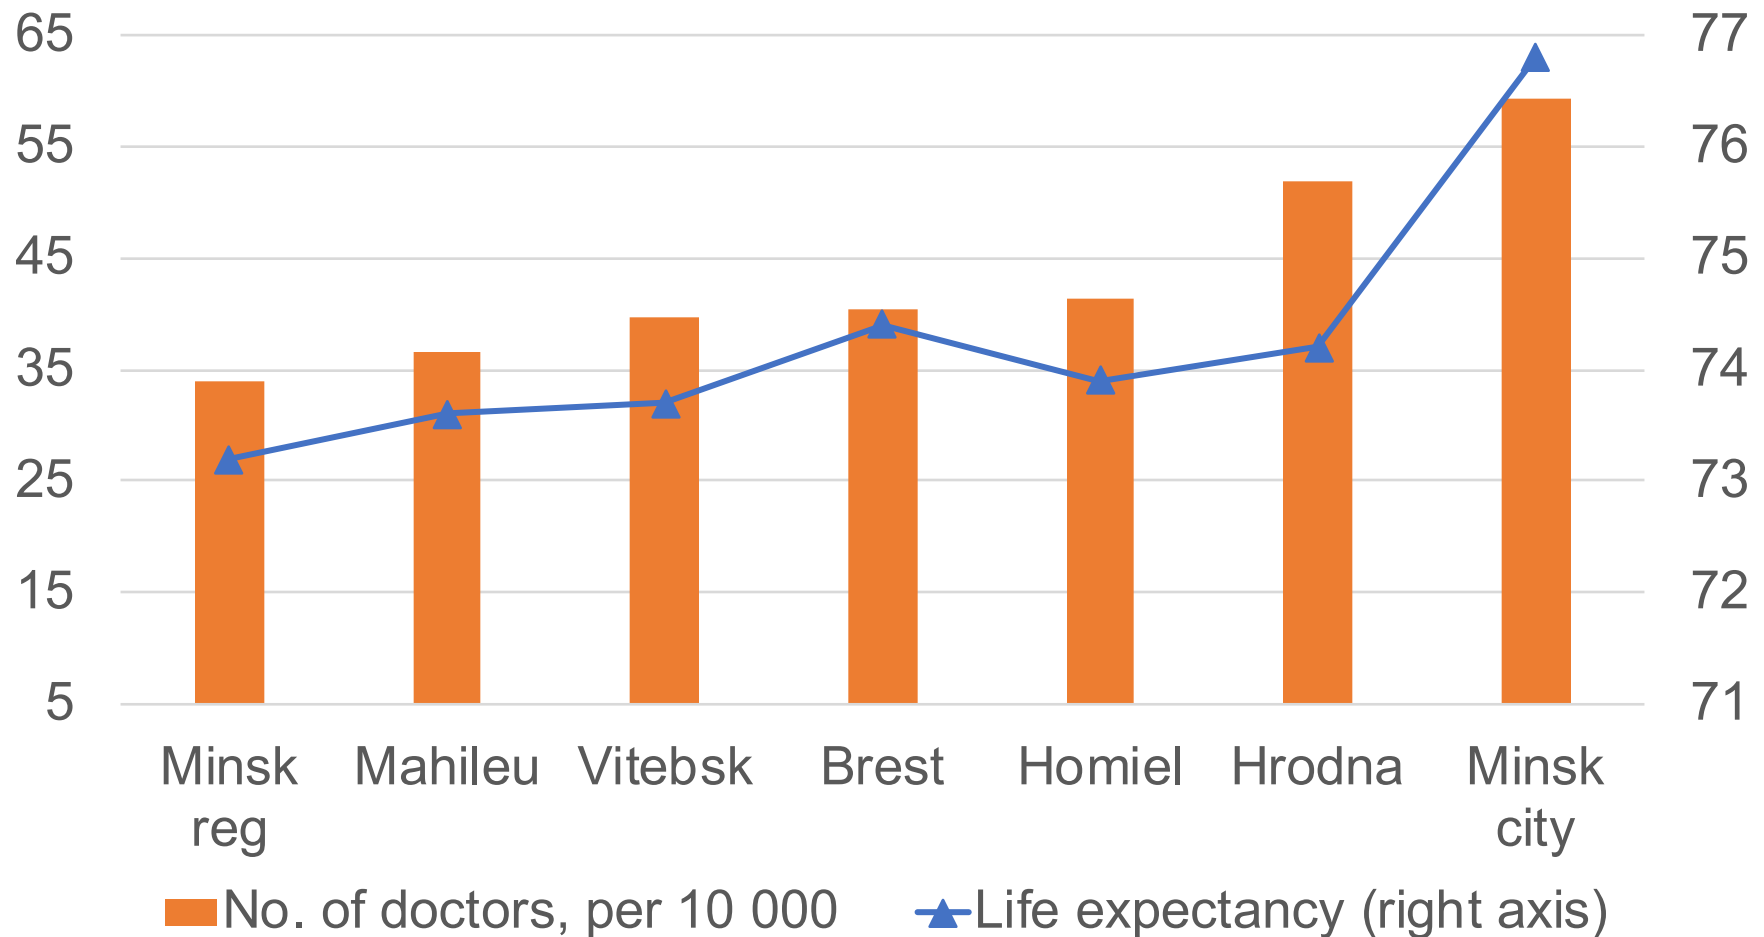

- The “social parasite” clusters coincide with low income and consumption areas

- Belarus ranked among top 10 countries with the lowest infant mortality rate
- But: low life expectancy

Life expectancy, 2016

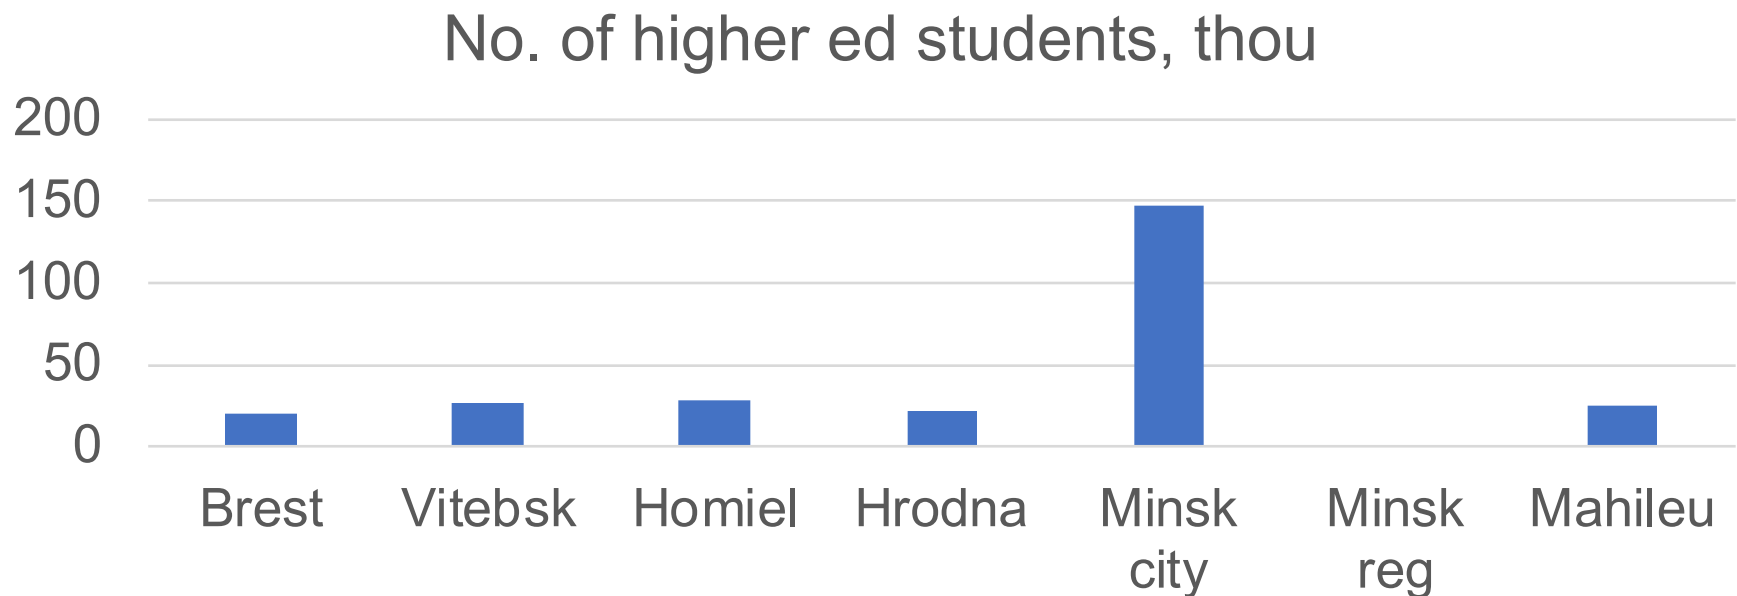

# Access to healthcare

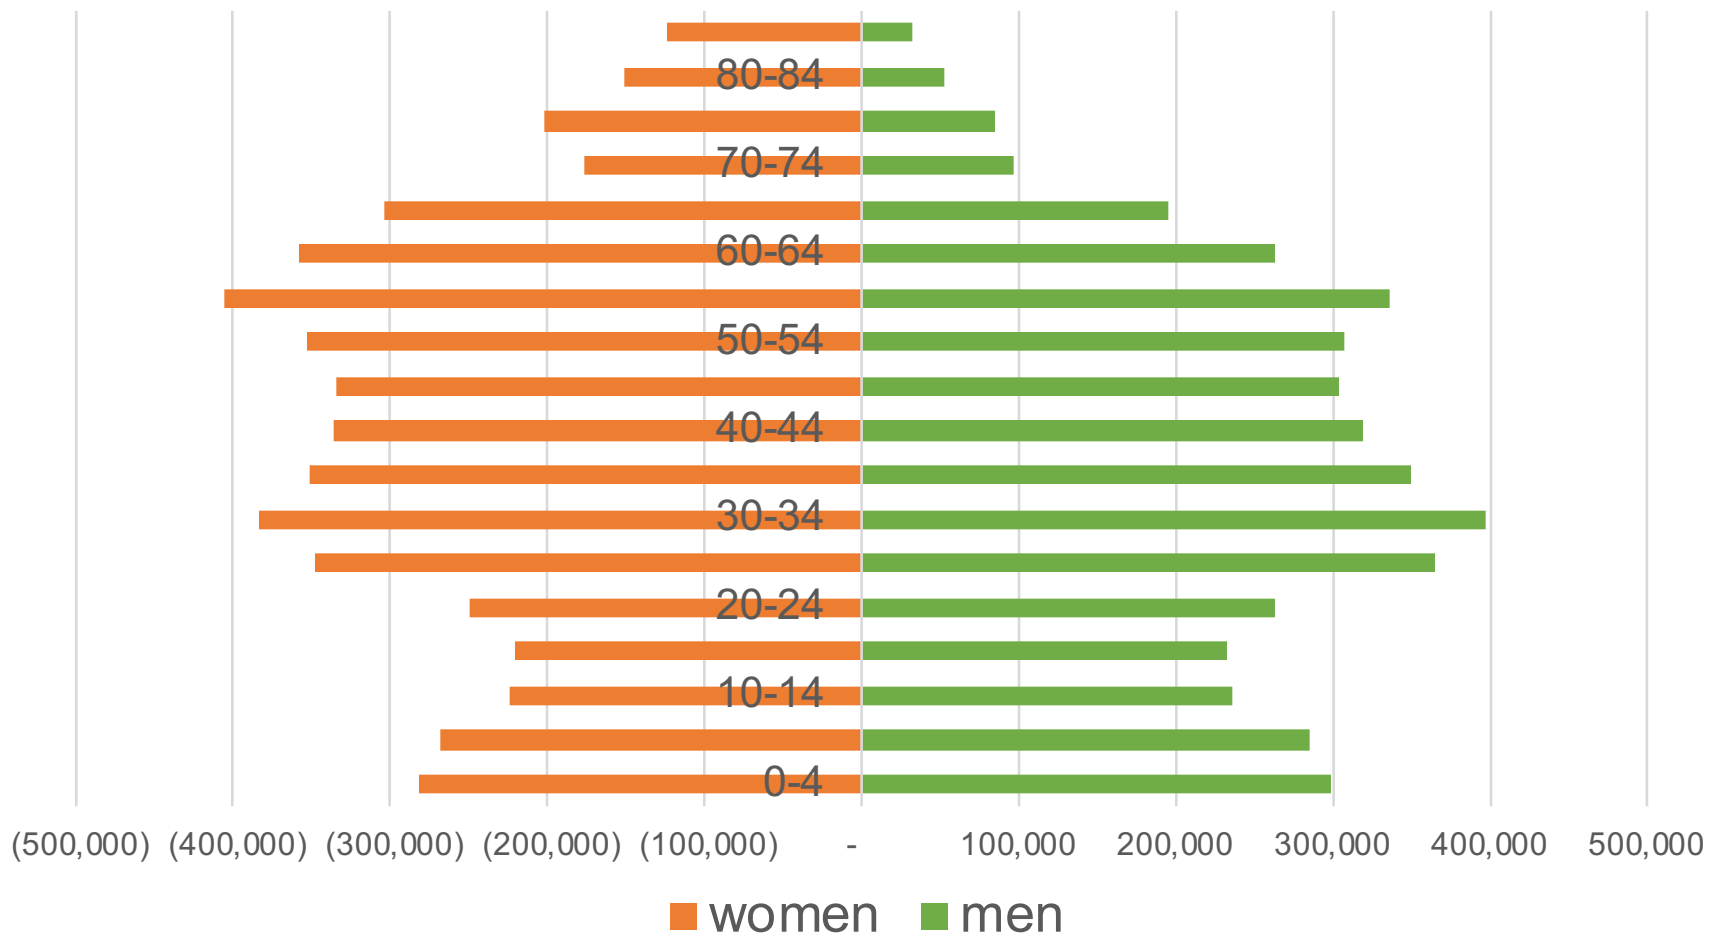

# Education

- No good measures of quality
- High educational attainment (tertiary enrollment 86.7%)
- Problems with inclusion

# Demography

## Demography Tree, 2018

# Ageing Population: Challenges

- Pressure on pension system
  - Retirement age increase (but health ageing at 60.5)
  - Entitlement “traps”
- Healthcare & Education
  - How to satisfy demand?
  - Big “waves”
- Fertility: how to boost it?
- Labor market

# Conclusions

- Belarus effectively fights poverty
  - But: vulnerable groups; regional disparities
  - Increase in unemployment and poverty benefits would help
- Slow economic growth puts achievements at risk
  - How to make healthcare and education sustainable?
- Demographic challenges
- Can we sustain employment for all?
  - SOEs are not capable anymore
